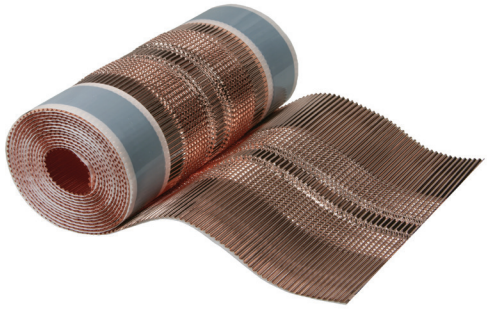
Product overview

Mage copper roll is a ridge and hip roll made of high-quality solid copper metal with two butyl adhesive strips on the back. It offers lasting protection in all weather conditions and, with an elongation factor of 30%, achieves optimum conformability to the roofing.

- Optimal protection against driving snow and rain penetration
- Excellent conformability to the covering material
- Easy bending at the ridge and hip battens thanks to prefabricated bending beads
- Straight alignment ensured by a specially embossed center section
- Ventilation cross-section in accordance with DIN 4108 Part 3
- Protection against insects and birds
- ZVDH warranty



Technical specifications

Specifications	
Technical	
Colour	Material own
Material	Copper
Performance	
Ventilation capacity linear	160 cm^2/m
Adhesive material	Butyle
Self adhesive	☑
Stretch length	30 %
Stretch width	0 %
UV resistance	☑
Dimensions	
Length gross	5 m
Length gross	5,000 mm
Width	300 mm
Height	300 mm
Length nett (working length)	5 m
Length nett (working length)	5000 mm
Thickness	2.6 mm
Net weight	1.75 kg
