Product overview

Highly flexible flashing made from continuously pleated aluminium, designed to be folded into place on flashing sheets and roof windows. A pre-formed bend ensures a clean transition from the sheet metal fold to the flashing without damaging the pleating. The reverse side is coated with two butyl adhesive strips, which serve as an installation aid during folding and for sealing against the roof covering. It offers lasting protection in all weather conditions and, with a longitudinal stretch factor of 30%, achieves optimal conformability to the roof covering.

- Visually appealing surface structure
- Conforms perfectly to the roof covering
- Additional butyl adhesive strip to help secure the sheet metal seam
- Weather, long-term, and corrosion resistant

Technical specifications

Specifications	
Technical	
Colour	Material own
Material	ALU/Butyl
Performance	
Temperature resistance (min.)	-40 °C
Temperature resistance (max.)	90 °C
Can be glued	☑
Reinforcement	☒
Self adhesive	☑
Stretch length	30 %
Stretch width	0 %
Dimensions	
Length gross	5 m
Length gross	5,000 mm
Width	140 mm
Height	140 mm
Thickness	2.6 mm
Net weight	1.2 kg
