Damit Macher machen können.

Product overview

Highly flexible flashing made of continuously pleated aluminum for folding onto connecting plates and roof windows. A prefabricated bend ensures a clean transition from the sheet metal fold to the flashing without damaging the pleating. The back is coated with two butyl adhesive strips, which serve as an installation aid for folding and for sealing on the roof covering. It offers lasting protection in all weather conditions and, with a longitudinal stretch factor of 30%, achieves optimum conformability to the roof covering.

- Visually appealing surface structure
- Optimal moldability to the roofing
- Additional butyl adhesive strip as a fixing aid in the sheet metal fold
- Weather-resistant, long-lasting, and corrosion-resistant

Technical specifications

Specifications	
Technical	
Colour	Material own
Material	Zinc
Performance	
Temperature resistance (min.)	-40 °C
Temperature resistance (max.)	90 °C
Can be glued	☑
Reinforcement	☒
Self adhesive	☑
Stretch length	30 %
Stretch width	0 %
Dimensions	
Length gross	5 m
Length gross	5,000 mm
Width	140 mm
Height	140 mm
Thickness	3.7 mm
Net weight	1.2 kg
